SURECOAT
SYSTEMS

SureCoat Systems offers these products:

SureCoat	Withstands ponding water
Sure-a-Thane	For projects requiring additional testing approvals
SureSet	Quick-dry basecoat

SureSkrub For superior cleaning before application

SureCoat Poly-Mesh High-strength woven polyester mesh

Offer your customers the latest in Single-Ply Technology - The SureCoat Roof System!

The SureCoat Roof System is a single-component Liquid Single-Ply that cures into a completely seamless, self-adhered, waterproof, cool roof membrane that never needs to be replaced because its renewable!

EPDM, TPO, PVC, Hypalon and other traditional roofing systems all have seams that will eventually dry out and separate during thermal cycling. Water, heat and UV cause these manufactured sheets to crack, split, fracture, peel and delaminate. These roofing materials are not UV stable and much like silicone, acrylic and aluminum reflective coatings, these membranes are only considered to be UV resistant for a period of time before deteriorating to the point that requires replacement (not renewable).

Because SureCoat Systems has perfected the Single-Ply by eliminating seams, fasteners and adhesives, our products have continuous bonding properties, are self-adhered, self-flashing and are waterproof "surface to substrate". None of the vulnerabilities of a single-ply exist when using the SureCoat Roof System.

The SureCoat Roof System is lab and field tested and proven over millions of square feet of flat and low-slope roofs.

The SureCoat Difference

- ◆ Monolithic membranes — no seams, no fasteners, no holes in roof deck
- ◆ Excellent adhesion to most substrates and self-priming
- ◆ Non-disruptive installation with no equipment removal and no crane costs
- ◆ Single component — no mixing, no waste
- ◆ Self-flashing, self-adhering
- ◆ Less than 50 g/l VOC — no offensive odors
- ◆ Renewable warranty every 10 to 20 years for life of building
- ◆ No tear-off required
- ◆ High solid content — 10.426 dry mils/gal.
- ◆ 88% thermal emittance and 86% sunlight reflectivity
- ◆ Waterproof — .019 perms
- ◆ Ponding Water will NOT void Roof Warranty
